LOCKERS AND SEATING

mini-lockers

The dilemma of providing secure storage in confined spaces has been solved with Interloc's wall mounted mini lockers.

Mini-lockers, as the name suggests, are designed as smaller units, ideal for small personal items in either single user or shared situations. These wall mounted lockers have endless uses, with gyms, nightclubs and offices the more obvious applications.

The more compact size ensures minimal space consumption, whilst still allowing the safe storage of wallets, purses, mobiles, keys and so on.

Each door is keyed to differ, or can be fitted with padlock receptors, coin operated options or digital keypads locks.

Units are mounted via aluminium brackets connecting each bank of lockers with end panels finishing and strengthening the bank of lockers.

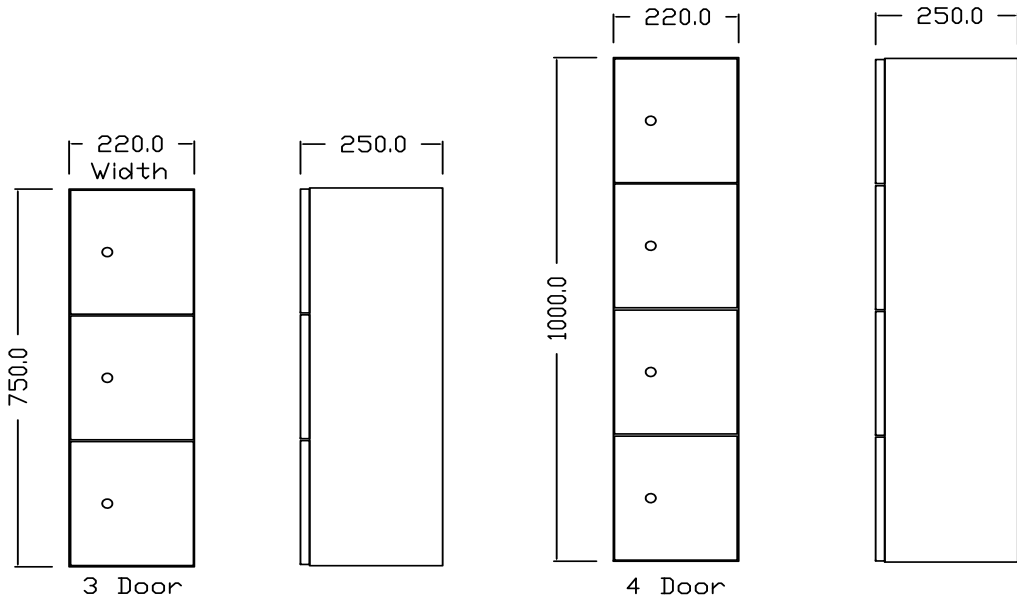

Each locker is 220mm wide, 250mm high and 250mm deep.

The timber laminated units are GECA certified.
