LOCKERS AND SEATING

Seating range

The use and comfort of locker rooms has been enhanced with the introduction of seating, including bench seating and ottoman style.

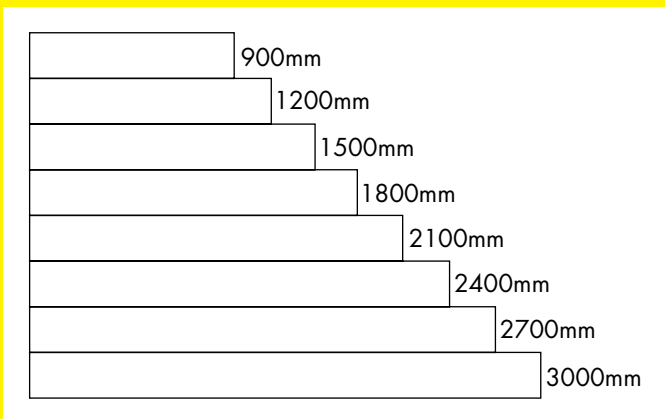

All seating is designed for convenience and durability. It can be positioned against perimeter walls or in internal configurations, in single or double sided formats.

The bench seating frame has been upgraded to a T-shaped leg, maximizing leg and foot room for users. Traditional four leg frames are still available as specials. Frame finish is powdercoat as standard.

The bench seat itself is available with a recycled timber slat as standard. Where required, solid Tasmanian Oak timber slats can be used. Concealed fixings and neatly finished edging provides an attractive and safe product, fit for use.

The alternative material selection for the seat allows the client to consider the use and conditions the bench will be expected to endure, as well as aesthetics and budget. In certain seating models, it is possible to integrate clothing and bag hooks.

Seat lengths are flexible, starting at 900mm and extending to 3000mm, dependent upon the choice of style and material.

seating range

Our latest seating innovation is a contemporary beam seat, comprising a powdercoated steel beam and chrome leg assembly. This sturdy base is fitted with a stylish perforated steel seat, featuring an ergonomic waterfall edge for safety and ease of use. Seats may be further enhanced by the application of a vinyl clad, multi-density foam cushion.

Easy assembly, disassembly, cleaning and refurbishment complete this very smart and modern solution offered by Interloc's new bench seating.

The ottoman bench seat is manufactured from quality, multi-density foam for firm support with seated comfort. Ottomans are fully upholstered in a vinyl finish, with a range of colours available. Cleaning and durability are obvious benefits of this type of seating. All ottomans are made in a standard width of 600mm.
