

## **Product Stewardship Program**

Product Stewardship is an approach that acknowledges that all those involved in producing, manufacturing, selling, using and disposing of products have a shared responsibility to ensure their environmentally sound management.

Interloc Lockers and Seating is an Australian owned company that designs, manufactures and install lockers. As part of our commitment to environmental sustainability we have a Product Stewardship Program in place.

Interloc Lockers have made a commitment to reduce, reuse and recycle our on-site waste wherever practical through our recycling program. The next step is to assist our clients to take back all laminate lockers from site to ensure the products and materials are reused & or recycled and diverted from landfill wherever possible.

The company has contractual arrangements with a number of recycling companies to include a recycler who recycles the laminate board back into particle/chip board and all metal hardware components will be recycled into the steel recycling stream.

### **The materials used in the lockers are:**

- Particle board E0 – Vertiboard
- MDF E0 - Lamiwood
- Hardware components

### **Product Stewardship Policy**

As part of our ongoing commitment to lessening our environmental impact, Interloc Lockers have made a commitment to takeback all GREEN STAR RATED laminated lockers to reuse or recycle laminate and hardware and divert materials from landfill where ever possible .

The lockers have been designed for disassembly to ensure that all Individual components can be recycled and reused if possible.

We advise the client informs Interloc Lockers when specifying the project of their intent to take up the take back system. Please contact our SALES department for a quote to initiate the collection of lockers for recycling.
